

Viper-Players use the radar screen to search for and destroy incoming formations of enemy fighters and helicopters. They can earn cash bonus points for knocking out formations and use the cash to buy more firepower from "crazy Ali", the weapons merchant. The spoils of war go to you, the operator.

Quarterback-This is the sit down version of our popular football game. This one will make every armchair quarterback sit down and take notice. One or two players can go at it on this cabinet, and the new control panel design allows players to control the whole game from their side.

Strike Zone-Tired of the same old thing? Not! Not when the same old thing has steady reliable earning power. Our new little guys will just sit there and collect quarters. One or two players can enjoy this old favorite as it was meant to be played. Throw a curve, steal a base, or hit a homer. It's all there!
